

28/08/20

Additional Maths practice

Converting common fractions to decimals

Adding decimals

Subtracting decimals

Multiplying decimals

What you will need to do:

- Convert common fractions to decimals by using short division (video tutorial in Week 5 Friday)
- Add or subtract them
- Convert the answer back into a common fraction
- Simplify if possible
- Multiply decimal fractions by using vertical multiplication (video tutorial in week 6 Thursday)

$$\frac{6}{12} + \frac{6}{8} =$$

$$\frac{2}{8} + \frac{1}{10} =$$

$$\frac{3}{6} - \frac{1}{4} =$$

$$\frac{3}{4} - \frac{1}{8} =$$

$$3.2 \times 0.7 =$$

$$1.8 \times 2.5 =$$

$$13.4 \times 3.7 =$$

$$15.7 \times 0.6 =$$
