

I would like you to use the time of this practice session to make an entry into your diary.

The topics you can write and draw about:

- Botany observation 3
- Copper craft
- Or something else that you have been really engaged in during the last couple of weeks

You will start by brainstorming ideas in your draft book, then sharing them with one of your parents.

After your story/description is corrected, you can copy it into your draft book and work on your drawing/illustration.

Make sure you treat your Diary like your Main Lesson book. That means, your story needs to be written in your most beautiful running writing. Your drawing needs to be neat and carefully done with a variety of colours.

Once we return to school, I will be looking carefully through your Diaries to see what you have been engaged with during this time.
