Extra maths practice

Measurement

Tom built a fence around his rectangular shaped pool. The posts were 1.5 metres apart, there are 7 posts along the length and 5 posts along the width. How many posts does Tom need and how long will the fence be? (drawing the pool and posts will help you to figure this out).

Paul weighed a pumpkin and found that it weighed 9kg. He cut the pumpkin and gave his friend a 500g piece. How many grams of pumpkin did Paul have left to make pumpkin soup?

Tony cut a five-metre piece of string into four equal sized lengths. How many centimetres long was each length of string?

A box containing 4 identical books weighs 5kg. If the weight of the box is 600g, what is the weight of each book?

I bought 10 bananas. Each banana weighed 50g. If the price for bananas was \$6.50 per kilogram, how much did I pay?
